A sneak peek at what your child is learning in their classroom this month and how you can continue their educational journey at home. Also, since it's National Hand Washing Awareness Month, we're stepping it up a notch in some of our classrooms with a certain cool for school tool!

Fighting off Germs

Did you know that 20 seconds is the proper amount of time to wash hands to ensure they are clean? During prime time cold and flu season and germs flying all around, we want to be sure our children can maintain their healthy hand washing practices. As you know, getting them to remember to wash their hands all the time is hard enough, never mind for 20 seconds. Some of our schools have integrated these Good Habits Soap Time tools in the classrooms just in time for National Hand Washing Awareness Week, which begins on Monday. Not only are the bottles fun, but SoapTime's Smart Base provides 6 unique songs & factoids for each bottle, which play during its custom LED light shows.
